Rifqi Taufiqurrohman

Frontend Engineer| +2 Years Experience

6282234099851 | rifqitaufiqurrohman1@gmail.com | linkedin.com/in/rifqi-taufiqurrohman98/ | https://rifqitaw.vercel.app/ | Bali, Indonesia

Summary

Frontend Engineer with 2+ years of professional experience building enterprise SaaS, ERP, education management, and e-commerce applications. Experienced in Vue.js, Nuxt.js, React, Angular, Laravel Inertia.js, TypeScript, and JavaScript, with a strong focus on scalable component architecture, API integration, responsive UI, accessibility, and web performance.

Currently developing an enterprise multi-tenant ERP platform using Vue 3 and Laravel Inertia.js, working across inventory, fulfillment, e-commerce integrations, and operational workflows. Experienced in cross-functional Agile teams and collaborating with backend engineers, UI/UX designers, QA, and product stakeholders to deliver maintainable and data-driven web applications.

Work Experience

Aw Advantage – Bali, Indonesia Jan 2026 – Present

Staff Developer (PKWT)

- Develop and maintain scalable web application interfaces for enterprise SaaS products using **Vue 3** and **Laravel Inertia.js**.
- Translate UI/UX designs into high-quality, reusable, and maintainable frontend components.
- Collaborate with backend developers to integrate RESTful APIs and business logic into responsive user interfaces.
- Improve application performance, responsiveness, and cross-browser compatibility.
- Apply component-based architecture, state management, and clean coding practices to support long-term product scalability.
- Participate in debugging, and continuous improvement of frontend development workflows.
- Work in an agile cross-functional team environment to deliver new features and system enhancements

Telkom Education Foundation – Bandung, Indonesia Aug 2022 – Dec 2025

Staff Frontend Developer (PKWT)

- Developed websites that comply with accessibility standards, policies, and procedures.
- Working using an Agile approach with a combination of Scrum and Kanban principles, in a cross-functional team consisting of System Analyst, UI/UX Designer, Backend Developer, QA, and Technical Writer.
- Designed, implemented, and managed web accessibility testing plans, including setting up and configuring testing tools.
- Collaborated with the development team to fix bugs related to functionality, performance, and design issues using **JavaScript**, **HTML**, **CSS**, **Vue Js, React Js, dan Angular Js.**
- Optimized web performance, ensuring fast loading times and responsiveness across multiple devices

Project Experience

Aiku – Enterprise Saas ERP Application **Present**

Aw Advantage (Confidential) | Developer

- Contributed to the development of a multi-tenant enterprise ERP platform supporting fulfillment operations, inventory management, and e-Commerce integrations.
- Built interactive dashboards, operational panels, and transaction interfaces using Vue 3 with Laravel Inertia.js architecture.
- Implemented frontend features for: inventory and stock monitoring, order processing and fulfillment workflows, tenant-based access and operational dashboards.
- Build reusable and maintainable UI components following component-based architecture and consistent design patterns.
- Optimize frontend performance and usability across complex, data-driven operational interfaces.
- Collaborate with backend engineers to integrate APIs and implement complex business workflows within the ERP platform.
- Contribute to a scalable SaaS architecture supporting multiple tenants and independent business operations.

DIGITS Telkom Schools Application – Application **Jan 2024 – Dec 2025**

Telkom Foundation (Confidential) | Frontend Developer

- Contributed to the development of the DIGITS web-based application for Yayasan Pendidikan Telkom (YPT), which enhances education management at Telkom Schools
- Developed frontend modules using Vue.js and Nuxt 3 for student admissions, academic management, curriculum, assessment, report cards, staff/student information, and alumni management.
- Worked on integrating key processes such as student admissions, academic data management, curriculum handling, staff/student information systems, assessment management, report cards, and alumni tracking.
- Collaborated with cross-functional teams to ensure the application meets the needs of educational staff and students.

Billing Collection - Application | Sep 2025 - Dec 2025

Telkom Foundation (Confidential) | Frontend Developer

- Enhanced and maintained a school billing and payment transaction platform for Telkom Foundation.
- Optimized AngularJS interfaces for finance administrators, staff, principals, and students.
- Collaborated with backend and QA teams to improve usability, reliability, and financial workflow integration.

Badminton Tournament Management | Sep 2026 - Present

Personal Project | Full Stack Developer

https://github.com/RifqiTaw/tournament-badminton-management

- Built a multi-community badminton tournament platform with Next.js, React, TypeScript, Express.js, PostgreSQL, and Drizzle ORM.
- Developed tournament administration workflows for player registration, draws, fixtures, standings, knockout brackets, and team relay formats.
- Implemented live match scoring for web and Expo React Native scorer clients, with real-time public score updates and role-based access.
- Organized a TypeScript monorepo with reusable domain logic, Zod API contracts, automated tests, and Docker-based development.

Badminton Management | Sep 2026 - Present

Personal Project | Full Stack Developer

https://github.com/RifqiTaw/badminton-management

- Developed a badminton community management application using React Native (Expo), Node.js, Express.js, TypeScript, and PostgreSQL.
- Implemented community membership lifecycles, player records, session management, subscription payments, and cashflow tracking.
- Designed REST APIs, database constraints, and transactional membership operations with validation and concurrency tests.
- Applied modular backend architecture, OpenAPI documentation, Docker, and multi-tenant community design.

Xiami Phone App - Application | Sep 2023 - Jan 2024

harisenin.com Bootcamp Project | Full Stack Developer

- Collaborated on a smartphone e-commerce application using React, Vite, HTML, CSS, and JavaScript.
- Developed backend functionality with Node.js and Express.js.

Education

Telkom University, Bandung, Indonesia | Aug 2016 - Jan 2021

Bachelor of Information Technology | GPA: 3.13 / 4.00

Thesis: Bandung Raya Tourism Route Optimization using the Cheapest Insertion Heuristic Algorithm - Python, CodeIgniter.

Technical Skills & Others

- **Programming Languages:** JavaScript, TypeScript, HTML, CSS, PHP.
- **Libraries & Frameworks:** React, Next.js, Vue, Nuxt.js, AngularJS, React Native (Expo), Inertia.js, Laravel, Bootstrap, Tailwind CSS, Node.js, Express.js, Drizzle ORM.
- **Tools & Platforms:** Git, GitHub, Vercel, Docker, PostgreSQL, OpenAPI, Playwright.
- **Interests:** Web Development, Responsive UI, Performance Optimization, API Integration, Full Stack Collaboration, Web Security Best Practices.
- **Practices:** Agile, Scrum, Kanban, Automated Testing, Debugging, Cross-functional Development.
